

To view the SSL certificate in Chrome/Edge:

1. Click on the lock icon located to the left of the location bar.
2. Expand the "Connection is secure"

3. Click on the Certificate icon located to the right of the window.

4. Confirm the "Issued To" is the expected party. Depending on what type of certificate was used by the organization, it may also state a different parent or sub organization but even with that said it should be recognizable if you're dealing with that organization.

To view the SSL certificate in Firefox:

1. Click on the lock icon which is also to the left of the location bar.

2. Click on "Connection Secure" to expand

3. Select "More information"

4. You can review the certificate from here. If you select “View certificate”, you can see the alternative domains that can also utilize this certificate.

The screenshot shows the 'Page Info' window for the URL <https://www.corpcu.com/>. The window has tabs for General, Media, Permissions, and Security. The 'Security' tab is active, displaying the following information:

- Website Identity:**
 - Website: www.corpcu.com (indicated by a red arrow)
 - Owner: This website does not supply ownership information.
 - Verified by: GoDaddy.com, Inc. [View Certificate]
- Privacy & History:**
 - Have I visited this website prior to today? No
 - Is this website storing information on my computer? Yes, cookies [Clear Cookies and Site Data]
 - Have I saved any passwords for this website? No [View Saved Passwords]
- Technical Details:**
 - Connection Encrypted (TLS_AES_128_GCM_SHA256, 128 bit keys, TLS 1.3)
 - The page you are viewing was encrypted before being transmitted over the Internet.
 - Encryption makes it difficult for unauthorized people to view information traveling between computers. It is therefore unlikely that anyone read this page as it traveled across the network.
 - [Help]
