

Backup

Traditional in-house or alternative disaster recovery center locations are becoming obsolete. Now, credit unions are moving to cloud backup services for reliability, scalability, flexibility, and improved security and compliance. Our technology CUSO, Think|Stack, is partnered with Acronis Backup Cloud to offer credit unions a safe, scalable, hybrid cloud solution that protects all systems and devices, anytime, anywhere. Highly customizable and cost-effective, Acronis provides backup, disaster recovery, and secure data access. Solutions include physical, virtual and cloud server backup software, storage management, secure file sharing, and system deployment.

Key Benefits

1. Retain total coverage by backing up everything at your credit union including disks, partitions, files and folders, and/or virtual machines.
2. Flexible control lets you choose full image, differential or incremental backups, or a combination to suit your business needs.
3. Built-in AI technology detects and defeats ransomware.
4. Backed by a multitude of awards, Acronis backs up faster than the competition.
5. Quick, convenient access to the cloud in just three clicks.
