

Cloud Security Cameras

The safety of your credit union employees and members is a top priority, which is why our technology CUSO, Think|Stack, partnered with Verkada to bring your credit union cloud security cameras. Verkada offers the best in enterprise protection by delivering a solution that scales limitlessly and is effortless to use. Unlike other solutions, ours is fundamentally different because physical safety is approached with a software-first mindset.

Verkada offers a wide range of enterprise security cameras, including durable indoor and outdoor domes, discreet minis, and panoramic fisheyes. All cameras include powerful onboard processing to analyze footage at the edge, streamlining the process to provide users with near-instant results when filtering through footage for meaningful activity.

Key Benefits

1. Access footage from any computer or mobile device, no downloads required.
2. Automatic firmware updates keep cameras up-to-date and cyber-secure.
3. Always know the health and status of your cameras, including offline alerts.
4. Receive notifications when cameras detect meaningful motion or tampering.
5. No NVRs/DVRs, thick clients, or added configurations, just a PoE connection.
6. In an emergency, easily share links of live footage via SMS or email.
