

## Employee Benefits

Established through a credit union driven collaborative initiative, I-Care empowers credit unions to take control of their increasing healthcare challenges by providing affordable, competitive, and sustainable coverage for their employees. We partner with credit unions to deliver an innovative group program to reduce the volatility and expense of health insurance by pooling risk. This revolutionary solution provides credit unions with the flexibility to choose from multiple networks, while individually determining their plan design and structure to best meet the needs of their employees.

## Key Benefits

1. The I-Care Community offers a variety of consulting services and funding solutions designed to reduce risk, lower costs, and enhance your credit union's employee benefits.
2. Enhanced data and analytics enable your credit union to make informed, long-term, strategic decisions. Managing your employees' medical claims is an enormous challenge, especially with the limited claims data many credit unions receive.
3. We were formed by a credit union advisory committee, which helped us create an array of solutions and business partners designed to provide credit unions with the options and flexibility they need.
