

CORPORATE CENTRAL CREDIT UNION FINANCIAL SOUNDNESS REPORT

June 2017

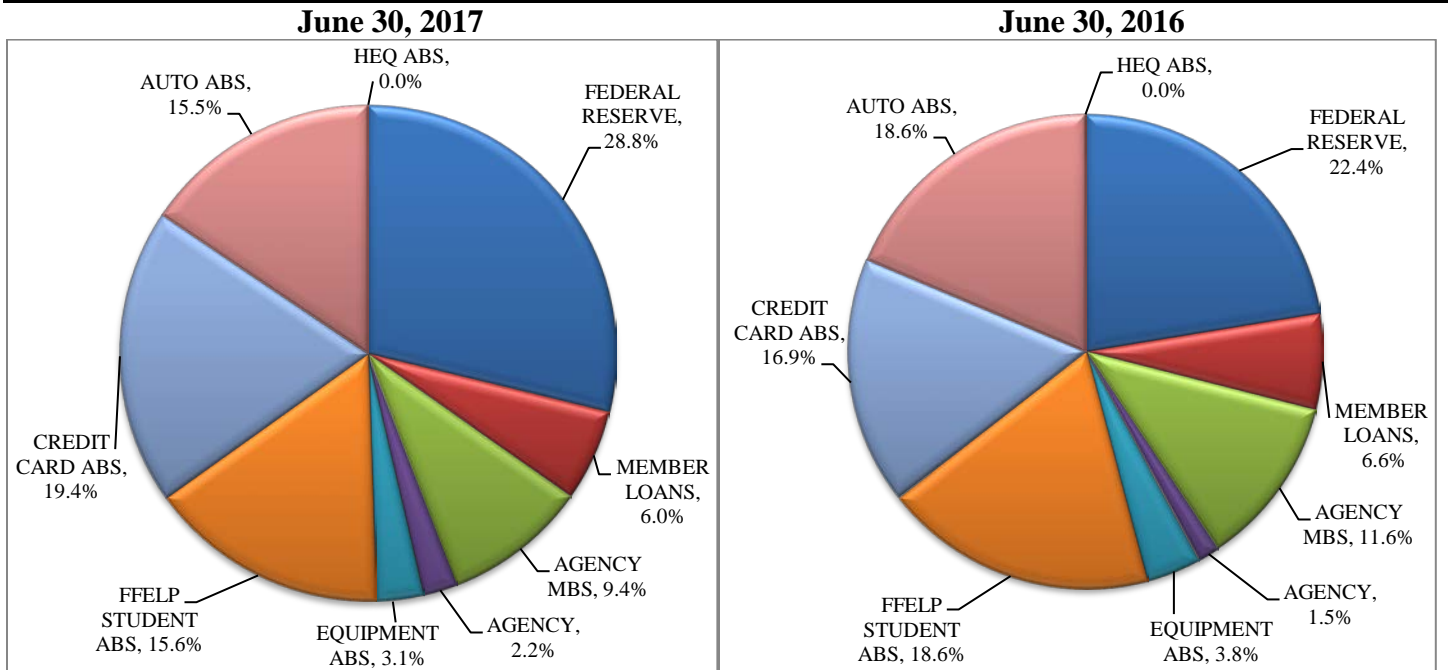

This monthly report is intended to provide transparency regarding Corporate Central Credit Union's key financial measurements. The report is a supplement to the monthly financial statements and other due diligence material that can be found in the Due Diligence Center of our website – corpcu.com.

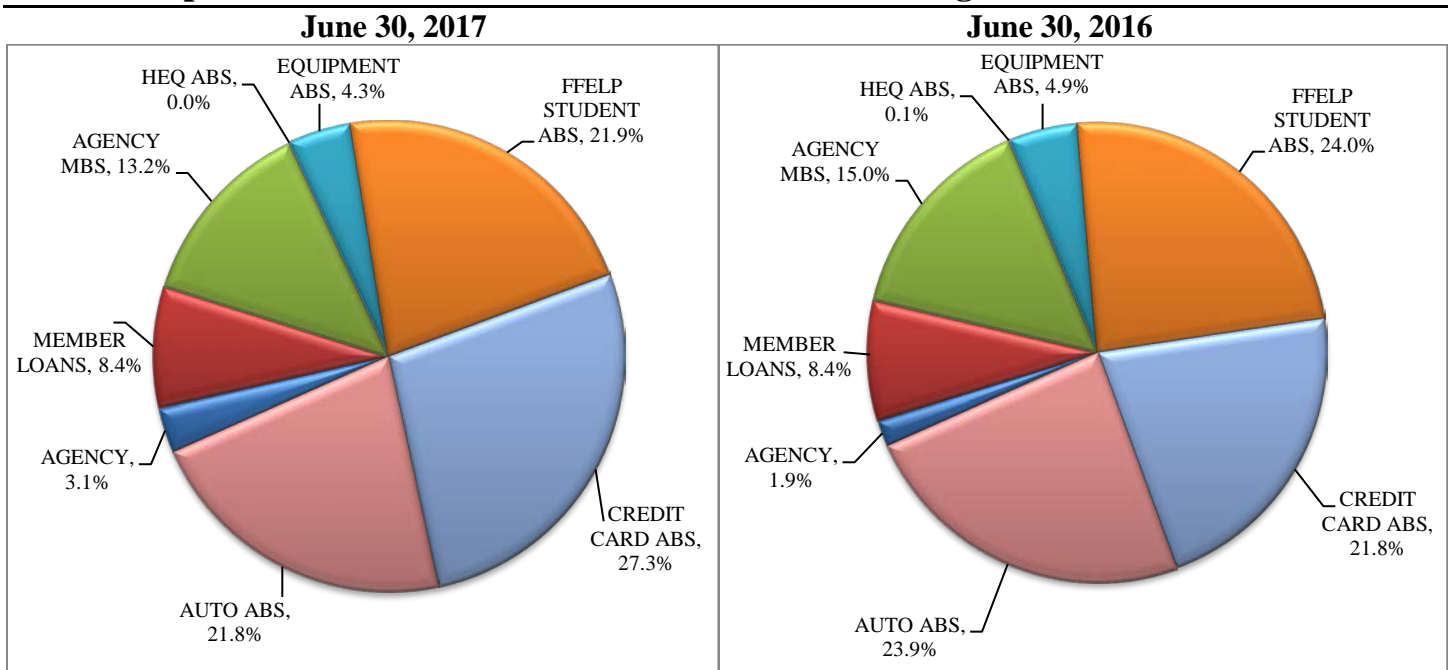

Diversification

As of June 30, 2017, Corporate Central had 28.8% of the investment and loan portfolio in deposits at the Federal Reserve. Investments in credit card asset-backed securities (ABS) represented 19.4%, FFELP student loan ABS, which are comprised of student loan-backed securities that are at least 97.0% guaranteed by the Department of Education, accounted for 15.6%, auto loan ABS represented 15.5%, and equipment ABS represented 3.1% of the portfolio. Agency mortgage-backed securities (MBS) represented 9.4%, agency debentures represented 2.2%, member loans comprised 6.0%, and Home Equity ABS accounted for less than 0.03% of the total portfolio.

Corporate Central's Portfolio Breakdown Year over Year

Corporate Central's Portfolio Breakdown (Excluding Cash) Year over Year

The risk rating breakdown and unrealized gain of \$2,217,326 on our investment portfolio can be seen below.

Marketable Securities as of June 30, 2017

	Book Value	Market Value	Unrealized G/L
U.S. Gov't/Agency	\$203,052,943	\$202,872,160	(\$180,783)
Minimal Amount of Credit Risk	\$933,713,585	\$936,176,232	\$2,462,647
More than a Minimal Amount of Credit Risk	\$562,310	\$497,772	(\$64,538)
Totals	\$1,137,328,838	\$1,139,546,164	\$2,217,326

Corporate Central's Capital Position as of June 30, 2017

	06/30/17 Actual Capital	Regulatory Adjusted Capital	Capital Ratios	Risk- Based Capital***	Regulatory Requirements- Well Capitalized Levels	
					Current	10/20/20
Retained Earnings	\$50,380,429	\$50,380,429	3.58%	7.44%	1.5% RE	2.5% RE
Perpetual Contributed Capital (PCC)	\$101,368,752	\$78,984,410	5.61%	11.67%		
Tier 1 (Core) Capital*	\$151,749,181	\$129,364,839	9.19%	19.11%	5% Core & 6% (RB)	5% Core & 6% (RB)
Tier 2 Capital	\$52,379,423	\$74,763,765				
Total Capital**	\$204,128,604	\$204,128,604	14.27%	30.15%	10% (RB)	10% (RB)

*Tier 1 Capital ratio is the regulatory adjusted Tier 1 capital divided by the adjusted 12-month moving Daily Average Net Assets (DANA), which removes the PCC adjustment amount from the 12-month DANA.

**Total Capital ratio is the regulatory Total Capital divided by 12-month moving Daily Average Net Assets (DANA).

***Risk-based (RB) capital ratios are regulatory adjusted capital divided by 12-month average, month-end Risk-Based Assets (RBA).

*Adjusted 12-Month DANA - \$1,407,814,717

**12-Month DANA - \$1,430,199,059

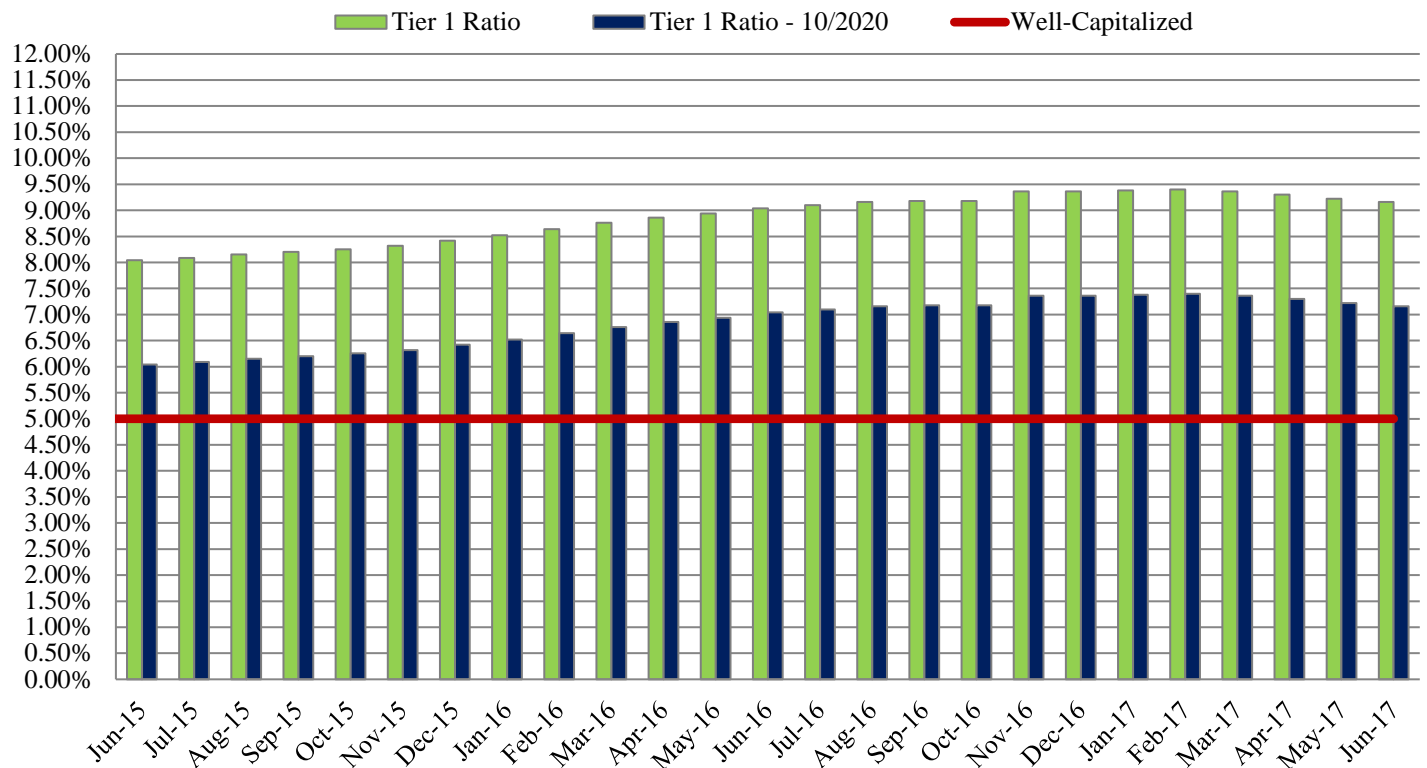

***12-Month Average RBA - \$677,092,134

In October 2016, the calculation in NCUA Rules & Regulations Part 704 that is used to determine the Tier 1 (Core) Capital Ratio for corporate credit unions changed. This more stringent requirement, and additional changes that will occur in 2020, has been discussed in prior months' Financial Soundness Reports. The capital amounts are shown above in two columns as actual and regulatory adjusted figures, and the capital ratios shown are calculated on a regulatory basis.

Corporate Central is in a position of strength versus the regulatory capital requirements and will continue to work to ensure that it is solidly positioned to remain above the well-capitalized requirements, which can be seen below.

Tier 1 Capital Ratios

- Current and October 2020 Calculations

In addition to growth in retained earnings, some of the increase in the Tier 1 Capital Ratio that has occurred over the past few years can be attributed to the decrease in Corporate Central's 12-month DANA, which is the denominator in the capital ratio calculations. This decline, as can be seen below, has been the result of the changing liquidity cycle, which has impacted our members' liquidity levels. While this trend has turned slightly in recent months, it is likely to continue over the near-term; and Corporate Central must look ahead to ensure it is well-positioned for the longer-term growth trends and turnaround that are likely to occur in DANA levels over time as the liquidity cycle changes. This will become increasingly important as the changes to the regulatory capital requirements occur again in 2020.

12-Month DANA History

Corporate Central's interest rate risk levels and economic value of capital as measured by Net Economic Value (NEV) and NEV Ratio remain well within regulatory limits as can be seen below.

Corporate Central's Net Economic Value (NEV) as of May 31, 2017

	Net Economic Value (NEV)*	% Change	Regulatory Limit	NEV Ratio	Regulatory Minimum
+300 Basis Points	\$206,759,219	0.93%	-20.00%	11.15%	2.00%
Base Case	\$204,850,570	0.00%	0.00%	10.98%	2.00%
-100 Basis Points	N/A	0.00%	0.00%	N/A	2.00%

*NEV is the fair value (FV) of assets in each scenario minus the FV of liabilities in that scenario, and is considered the economic value of capital. Perpetual Contributed Capital (PCC) and Non-perpetual Capital (NCA) are considered capital in the NEV calculation.

Additionally, Corporate Central's liquidity position remains strong. The large majority of available liquidity is in the form of cash and marketable securities. However, Corporate Central also has external lines of credit that can be used as necessary to meet members' liquidity needs, which can be seen in the table below.

Liquidity Sources as of June 30, 2017

	Total	Available
Cash	\$501,880,332	\$501,880,332
Marketable Securities*	\$498,022,756	\$448,220,480
External Lines of Credit	\$639,062,742	\$585,062,492
Totals	\$1,638,965,830	\$1,535,163,304

*Market value of securities not pledged for other borrowings/lines of credit. Available amount is assumed to be 90% of market value.
